

Comments

- 3 - Comments are on the more descriptive end, but information on the try/catch loop is advised
- Some ^{unexplained} ambiguities in the code, like the try/catch loops
 - Each method is clearly defined, but explaining some of the innards can be clarified

Style

- 4 - Consistently exhibits constant indentation
- Good variable names
 - ~~step~~ Some of the code that could have ~~ex~~ been expressed in one complicated line of code was broken down into multiple lines for clarity

Robustness

- 0.5 - Does not compile (35 errors), but the reason ~~is clear~~ of the errors is clear
- Errors are now 62 as of now

Readme

- 2 - Did not update the readme ~~as the work~~ concurrently with the code
- Clear description of the development process and clearly-stated prioritization
